

BELLWETHER LOGISTICS SERVICES

Globalization and cross-border trade are two of the most important economic trends. This extension of the supply pipeline leads to increased risk of stock-outs and to lead time variations. Traditional tactics to address lead time dynamics are:

- **Carry More Inventory**
- **Expedite Shipments**
- **Expand Team Management**

Bellwether Logistics Services technologies provide state-of-the-art solutions to international trade management:

- **Centralized System for Capturing, Storing and Managing Information**
- **Web Enabled Tracking and Reporting Down to the SKU Level**
- **"Exception" and "Notification" Utilities Create a Proactive Management Environment**
- **Execution Management**

• Global Intelligence •

** Global Visibility * Global Inventory Control * Global Transportation Control **
